

RUBRICS FOR FINAL PROJECT EVALUATION DBMS AND VIVA COMPONENTS

There shall be viva based on all the below mentioned components.

1. Project Overview
2. ER Diagram
3. Schema Design
4. Normalization (1NF, 2NF, 3NF)
5. Keys (Primary, Foreign, Candidate)
6. SQL Basics (DDL, DML, DQL)
7. Joins
8. Group By & Having
9. Subqueries
10. Functions (Aggregate & Scalar)
11. Views
12. Stored Procedures
13. Transactions (ACID, COMMIT, ROLLBACK)
14. Indexing (Basics)
15. Output Explanation (Project Queries)

No.	Evaluation Criterion	Max Marks	Weak	Average	Good
1	Project File Handling & Structure • Neat and organized, Overall Plagiarism <10%, with No AI plagiarism • Well-structured file as per the report template	10	5	7	9
2	Problem Definition & ER Design • Clear Problem Statement • Correct ER diagram Flow	8	4	5.5	7
3	Schema Design & Normalization • Correct tables + Primary Key/Foreign Key • Indexing basics (Primary index / simple indexing) • No redundancy (normalized)	8	4	5.5	7

No.	Evaluation Criterion	Max Marks	Weak	Average	Good
4	SQL Implementation • Use DDL, DML , DQL , TCL etc. Queries/Sub-Queries • Use of FUNCTIONS, JOIN, Views, Procedures	10	5	7	9
5	Testing & Explanation • Output + explanation of queries	4	2	3	4
	Total	40	20	28	36
